Capabilities Development and the efforts for the European Union for a European Armament Cooperation

2019. november 22., péntek 13:50 (20 perc)

Capabilities development is a very complex process, that involves interactions between industrial suppliers of goods and services with multiple government offices often trying to balance competing objectives. The big dilemma is: How governments acquire the equipment, goods, and services needed for their armed forces at a reasonable price, appropriate quality, and with a reasonable time frame? Yet the defense acquisition system is in perpetual state of reform, the fact is there is no evidence of improved acquisition outcomes. In this research R&D Defense acquisition system will be analysed.
