Pros and Cons of implementing the BRI in Kazakhstan

2019. november 22., péntek 11:30 (20 perc)

The “Belt and Road Initiative” is a great chance for Kazakhstan, it gives an opportunity to create a huge economic space from Asia to Europe. Berlin, Moscow, Nur-Sultan and Beijing will be the main points on this transcontinental line. Kazakh-Chinese projects need to be more openness to explain the socio-economic advantages. For successful implementation of the project, it is necessary to enlist the broad support of the population. Explain to them about the benefits and the number of new job positions. Meanwhile, remember about the environmental impact and do not become dependent on China.
